

# Environmental Policy Statement

Leeward Renewable Energy (LRE) is committed to leading the industry in protecting and enhancing our planet for future generations. To support this commitment, we seek to continuously improve our environmental performance through responsible and innovative programs and initiatives.

Our commitment to environmental protection and enhancement extends to all our stakeholders including our valued employees, customers, and the communities in which we operate.

## LRE is committed to:

### Compliance

- Complying with all applicable environmental regulations, legislation, and LRE sustainability commitments

### Environmental Stewardship

- Minimizing ecological impacts during the construction and operation of our renewable energy projects, and actively seeking and implementing land and ecosystem improvement for the land under our management
- Assessing and managing risks from the physical impacts of climate change and supporting the transition to a low-carbon economy
- Taking responsibility for the management of the full lifecycle of our projects, including the lifecycle of the products that comprise our projects, thereby minimizing waste and emissions, and reducing resource consumption through re-use, recovery, and recycling programs
- Building resilient supply chains by implementing procurement practices that consider environmental and ecological impacts of our projects, plants, and offices
- Implementing responsible water management practices minimizing water usage at our offices and projects

### Transparency

- Promoting the transparency of our environmental performance and initiatives
- Identifying, measuring, and implementing mitigation measures for greenhouse gas emissions from our business operations
- Communicating our environmental commitments and efforts to our valued stakeholders, providing the necessary environmental program training, and empowering stakeholder contribution and participation

### Continuous Improvement

- Pursuing continuous improvement by ongoing review of our Environmental Management System, objectives, targets, policies, and procedures to incorporate lessons learned and best practices, and, no less than annually, revisit and republish this Environmental Policy Statement.
